

SABER-PID: from requested-drawing evidence to an engineering operating decision

Qualify the task and budget first; choose the precision--coverage mode second.

PIDQA requested drawing F1 0.555 correct 0.006 shuffled 0.000 no image +0.549 correct - shuffled	Mild quality shifts Clean / JPEG / blur / 0.75x restore; 230 sources effect 0.548-0.575	Matched-budget InternVL F1 0.485 correct 0.013 shuffled 0.000 no image +0.472 requested-drawing effect	Public DEXPI transfer F1 0.906 correct 0.000 shuffled 0.000 no image 35 images / 26 logical cases
---	---	---	--

Cost-aware mode selection ($r = C_{FN}/C_{FP}$)
Intersection: $r < 0.528$ | OCR joined: 0.528-0.625 | OCR-first: 0.625-2.014 | Union: $r \geq 2.014$

Qualified output: configurable candidate-tag retrieval under the evaluated PIDQA and public DEXPI conditions.
