

From a P&ID score to task-bounded evidence

A. Image-grounded value/tag reading

Question: Find all tags of 27 symbols that begin with RO | Reference: ro-10 364, ro-10 525, ro-10 545

PIDQA sheet 282 (CC0)

B. Structural counterexample: an image does not add value uniformly

Question: What is the number of 16 and 13 symbols' direct connections? | Reference: 0

PIDQA sheet 184 (CC0), full source image

26 eligible; selected minimum hash 009fb29c6397...

No image

Verbatim output: 0

strictly correct

3072 correct image

Verbatim output: 2

strictly wrong

Supported conclusion: visual value is task-specific; correct-image input is not a guarantee of structural accuracy.
