

Supplementary boundary controls and operating quantities

S1A. Structural correct-image increments at 3072 / 192

S1B. Corrected InternVL tile-budget boundary (n = 400)

S1C. Recorded operating quantities

Condition	Actual input	Tokens mean / p95	Cap rate	Latency s mean / p95	Peak GiB
Qwen 768 correct, value, 512 cap	2211840	421.2 / 512	79.0%	9.21 / 11.26	16.50
Qwen 3072 correct, value, 512 cap	35979264	54.7 / 512	6.0%	1.78 / 11.68	18.17
InternVL 1 tile, all tasks, 192 cap	1 / 602112	51.0 / 192	17.8%	1.42 / 5.22	16.04
InternVL 7 tiles, all tasks, 192 cap	7 / 4214784	16.4 / 63	2.8%	0.61 / 1.86	17.41

Latency is end-to-end generation time and co-varies with output length; it is not interpreted as visual-encoding cost. NR = not recorded.
